

Revised: 5/14/2020

Micmac Farms Commitment to Humane and Sustainable Agriculture.

We handle our catch with the utmost care because we respect the gifts of mother earth and are sustaining the future of our seven generations.

Compost generated from our recirculating aquaculture facility is recaptured and utilized as the fertilizer product on our orchards and produce fields. We promote environmental stewardship through onsite learning and structured tours to educational Pre-K through college level. Micmac Farms utilizes natural methods to produce wholesome foods and agricultural products to support local food sovereignty, food security, and the health of northern Maine communities.

In respect to the interconnectedness of all living things given by mother earth, all life under the stewardship of Micmac Farms is respected and treated with the utmost care for their distinct and unique purpose of life.

The mission of Micmac Farms is to provide a source of sustainably-produced wholesome foods for northern Maine communities while supporting meaningful local employment opportunities.

this time and allows us to disinfect surfaces between visitors while offering hand sanitizer upon entree.

To Our Valued Customers, Suppliers, and our Community: As we all face this difficult time, we at Micmac Farms would like to inform you of what measures and policies we are taking in light of COVID-19. These policies will be instituted and adhered to immediately.

- 1) All Employees who show symptoms of any illness will be immediately sent home
- 2) There will be increased and heightened cleaning and disinfecting of all surfaces that employees and customers come in contact with. Including between each guest's visit.
- 3) Staff will be required to be diligent with handwashing around the clock.
- 4) Customers will be directed not to touch any product in self serve areas. Staff will now assist in selecting products.
- 5) Hand sanitizers are available in public areas.

We are proud to represent our corner of the County at these shows and it is very disappointing to miss these opportunities to engage the public in the innovative practices taking place in Caribou, Maine. We are thankful for the accessibility of our local officials and the guidance of our Micmac Health Department, Micmac Environmental Laboratory, and The ABM Emergency Management Team.
